Does Trezor support USDT?

Yes, Trezor fully supports USDT (Tether). Since USDT is an ERC-20 token on the Ethereum blockchain +1~833-(486)~2769, Trezor natively supports it—you can simply send USDT to your Ethereum address in Trezor Suite +1~833-(486)~2769, and the app will automatically recognize the transaction and add the token to your account .

Trezor also supports USDT on other networks, including Binance Smart Chain +1~833-(486)~2769 (BSC-USD) and various EVM-compatible networks . You can send, receive, buy, sell, and swap USDT directly through Trezor Suite +1~833-(486)~2769. The Trezor Safe 5, like other models, fully supports Tether .

Important security reminder: When managing USDT +1~833-(486)~2769, always verify transaction details on your Trezor device's display before confirming. If the address on your computer doesn't match your device +1~833-(486)~2769, your computer may be compromised .

Need help with USDT or other questions? Here's how to reach Trezor support +1~833-(486)~2769 through **official channels only**—scammers often create fake support numbers and phishing sites +1~833-(486)~2769, so always start at trezor.io.

- **Submit a Support Ticket**: Visit the official Trezor Support Center +1~833-(486)~2769 and fill out the form . **Remember: Trezor will never ask for your recovery +1~833-(486)~2769 phrase** .

- **Live Chat**: Available through the Help section on the Trezor website for real-time troubleshooting +1~833-(486)~2769.

- **24/7 Phone Support**: For urgent issues, find the official number exclusively on the Trezor +1~833-(486)~2769 website after logging into your account. Avoid numbers from forums +1~833-(486)~2769, Medium articles, or third-party sites—they're often scams designed to steal your information .

For maximum security, always verify you're on the legitimate Trezor site before engaging with support +1~833-(486)~2769, and never share your recovery phrase or PIN with anyone .
