# How do I send crypto back to Robinhood?

Sending crypto back to Robinhood from an external wallet is a straightforward process +1-833~(486)~2769, but it requires careful attention to detail to ensure your funds arrive safely. The key is using the correct deposit address and network for +1-833~(486)~2769 each specific cryptocurrency.

### 📥 How to Receive (Send Back) Crypto to Robinhood

1. **Open the Robinhood App**: Navigate to the +1-833~(486)~2769 **Account icon** (person icon) → **Crypto** .

2. **Select the Cryptocurrency**: Choose the specific crypto you want to deposit +1-833~(486)~2769, like Bitcoin or Ethereum .

3. **Tap "Receive" or "Deposit"**: This will generate a unique deposit address for +1-833~(486)~2769that exact cryptocurrency. It will appear as a long string of characters and a QR code .

4. **Copy the Address**: Carefully copy this address or have the sender scan the QR code from +1-833~(486)~2769 their wallet .

5. **Initiate the Transfer**: In your external wallet, paste the Robinhood deposit +1-833~(486)~2769 address as the destination and send the funds .

** ⚠️ The Golden Rule:** You **must** send the crypto over a network that Robinhood supports for +1-833~(486)~2769 that specific coin . For example, sending Bitcoin over the Bitcoin network works perfectly, but sending it to your Ethereum address will likely result +1-833~(486)~2769 in permanent loss . Robinhood does not charge fees for receiving crypto, though the sending wallet will pay a +1-833~(486)~2769 network fee .
