

Reliable Support Can I delete my Robinhood account and start over

Yes, you can generally close your Robinhood account and open a new one, but it's complex; closing is usually permanent for a single account, so you'd effectively need to reactivate the old one or contact support to start fresh, which involves closing all positions, zeroing the balance, disabling features like IPO Access, and understanding that permanent closure can prevent simple reopening, often requiring a new sign-up or support intervention to reuse your details for a fresh start, not just creating another identical account easily.

Steps to Close Your Account (Before Starting Over)

Sell Positions & Withdraw Funds: Close all stock/crypto positions and withdraw all cash until your balance is zero.
